A QUIET REVOLUTION
A Quiet Revolution
In a buzzing and ever-changing world, the serenity of nature remains

At Cibes Lift Group, we focus on you and all parts of your life. We create room for your needs, for greater visions, for people and the environment. Our latest innovation is a revolution for screw-driven lifts. A quiet revolution. We call it EcoSilent.
Perfect home lifts.
Easy to integrate, easy to enjoy

Cibes offers you perfect home lift solutions. Our ready-made lift concept and compact footprint have minimal structural impact on your home. The EcoSilent system offers you the option to make your lift quieter and more energy-efficient. The perfect lift for your home and for the planet.
Quiet operation with your experience in mind

We want you to be able to enjoy the comfort of your lift, day and night, without ever waking your family. To offer you and your loved ones a smooth and quiet ride, we took inspiration from the serenity of Swedish nature. The result is virtually soundless.
Coffee machine – 60 dB

In a quiet bedroom – 30 dB

Cibes EcoSilent – 40 dB

Running the tap – 85 dB

Dishwasher – 55 dB

Normal conversation – 60 dB
We care about you and we care about the planet

We design lifts with people and the environment in mind. EcoSilent is one of the most silent and energy efficient systems for screw-driven lifts in the world.

A lift equipped with our innovative drive system carries Energy Label A and uses 45% less energy than a lift without. It contributes to a sustainable lifestyle by helping you reduce your ecological footprint.
EcoSilent. Because sustainable is beautiful

- Energy-efficient
- Virtually soundless
- Elegant design
In our urbanized and constantly connected society, noise is everywhere. This is why an increasing number of architects incorporate quiet zones in their building projects. EcoSilent fits right in with that logic.
Designer’s guide to EcoSilent

Welcome to the design department. Timeless beauty, smart functionality and high-quality engineering are the secrets behind our success. This is Scandinavian design at its best.

Expressions inside and outside the box

We make it possible for you to design your lift from floor to ceiling. Create your own style by using ideas from inside or way outside the box. Make the lift become an expression of you.
**Colours, floors & glass**

**Pick your favorites from our collections**

**Floors**
The lift floor is delivered in dark grey, anti-slip PVC as standard, but we offer a wide range of different floor styles. Customize your own floor with laminate or tiles.

- **JANUARY 4**
  - AE03217049420

- **RAL 7016**
  - ANTHRACITE/GREY
Mix and match with colours and materials

It is easy to transform your lift into a beautiful, architectural feature. Get inspiration from our design examples, or create your very own lift design by mixing different colours and materials.
Silent and sustainable technology

Guide rollers
The guide rollers reduce the frictional force by 90% and need no lubrication, which facilitates maintenance.

Drive unit
The new drive unit has been completely redesigned for silent and energy-efficient operation.

Lifting screw
The lifting screw has a 3 x higher pitch (36 mm) and the new screw joints are so smooth that you hardly notice them during lift travel.

SilentBox
The drive unit is enclosed in an elegant soundproof metal casing, designed to cover up the drive unit and to eliminate high-frequency noise.

Decibels measured 2 m from the lift, at constant speed and with a 150 kg load. All tests conducted by Springwell Audio AB, member of the Swedish Acoustical Society, www.springwellaudio.se.

All Cibes lift models carry the CE mark and go through extensive testing and quality checks before leaving our factory. Our lifts are certified products that comply with European quality standards, Machinery Directive 2006/42/EC and EN 81-41. This product information is general and we reserve the right to modify product design and specifications. Minor deviations in color reproduction can occur.
