

Cibes SwingOn

Cibes Swing On is a unique lift-and-turn stairlift solution for public, commercial and private environments.

Flexible low rise lift

- Rated load 300 kg
- Lifting height 500 mm
- Robust and compact
- Protrudes from wall only 250 mm in folded position
- Silent and smooth operation
- Easy to install and maintain
- Adapted to tough outdoor environments
- Swedish design and quality
- Vandal resistant
- Lifts, turns and folds away
- User-friendly and fully automatic

Cibes Lift develops, manufactures and sells lift solutions in different sizes, platform lifts as well as cabin lifts for public and private environments. Our distributor network is worldwide.

Our business concept is to deliver intelligent, flexible lift solutions which are adapted to different markets and individual needs. Cibes SwingOn is a low rise lift designed for improved accessibility in public, commercial and private environments. This lift model is a smart, space saving and cost efficient solution.

Compact and ingenious

Cibes SwingOn lifts, turns and then neatly folds away against the wall when parked. This makes it the perfect solution for entrances where space limitations make traditional stairlifts or ramps unsuitable. Cibes SwingOn is wall mounted and unfolds from the wall when necessary via an ingenious mechanical solution.

Fast installation and easy maintenance

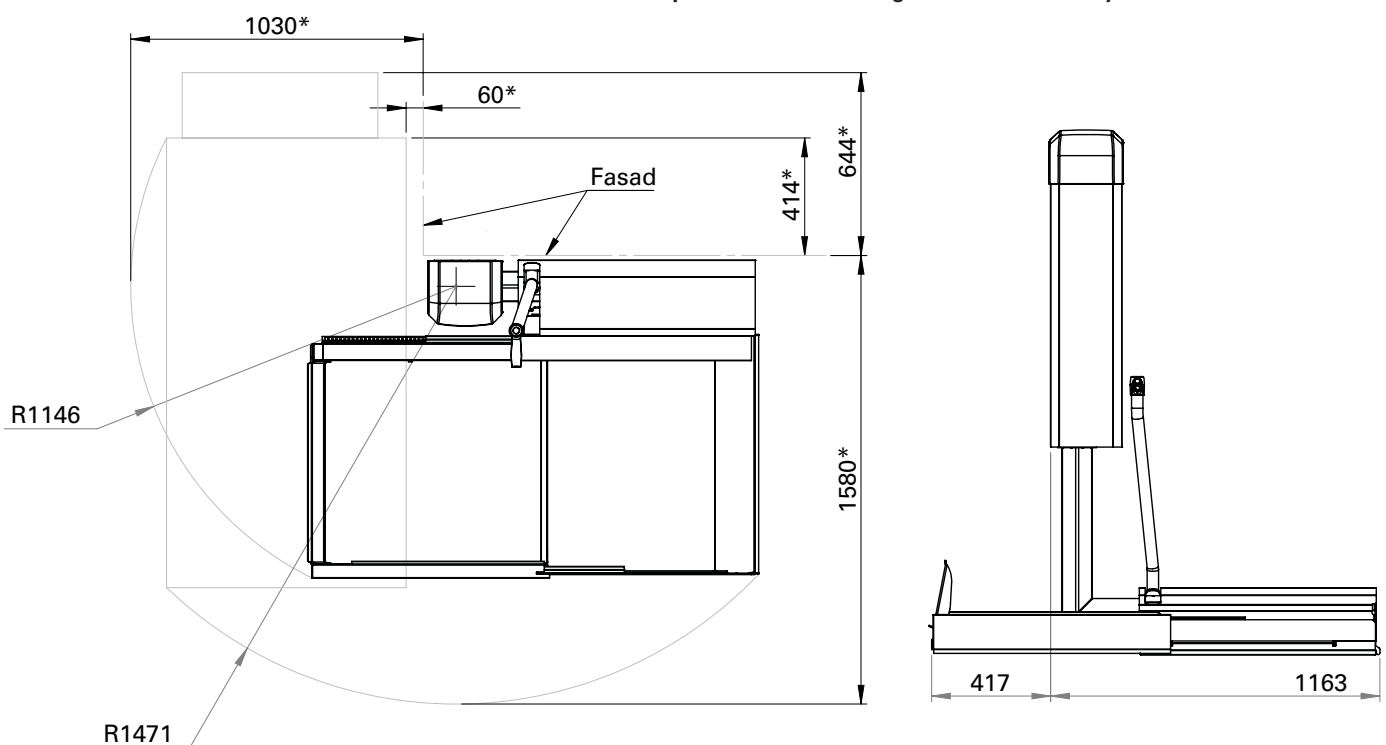

Cibes Swing On is fixed directly to the wall, which makes the installation fast and easy. The installation can be done in a day. The construction is robust and all parts are readily accessible for maintenance.

The perfect solution

- Where lifts and ramps are not suitable
- Protrudes from wall only 240 mm in folded position
- Where a fully automatic and space saving lift is important
- Where accessibility creates business
- Where aesthetic design adds value

* Dimensions depend on wall mounting and facade. Can vary from installation to installation.

Characteristics	SwingOn
Environment	Indoors/Outdoors
IP	IP44
Rated load	300 kg
